Stucco worker and plasterer / drywall builder

Light has a visual, biological and emotional effect

Light makes visible, has an activating and relaxing effect, shapes the room and fills it with mood. An intelligent lighting concept is based precisely on these three pillars.

In connection with LED technology, ecological and economic energy efficiency add value. Whether new construction or building renovation - LED lighting solutions meet every requirement in terms of sustainability and lasting value.

Functionality and aesthetics in harmony

Intelligent LED lighting concepts from ISOLED® pursue sustainable goals! The highest functionality and timeless aesthetics paired with ecological and economic energy efficiency promise when using a holistic LED lighting solution with integrated LED lighting control technology from ISOLED® a value-adding result.

Operational productivity with intelligent LED lighting solution

Glare-free and standard-compliant LED lighting for work areas creates an activating and motivating environment for employees and thus not only increases in-house productivity, but also ensures the desired safety in the workplace.

- Functional industrial and workshop lighting,
 - staging sales room design,
 - inspiring and stimulating office lighting
- demonstrably contribute to economic success.

A room becomes a living space!

An atmospheric lighting solution, in conjunction with functional light sources, transforms every living room into a cozy home. In addition to the furniture and colors, the choice of the lighting concept is one of the most important interior architectural components in living space design.

Light creates harmony, emotion, influences the mind and when used correctly it enables people to create their own world.

YOUR ADDED VALUE WITH ISOLED®!

Standardised product range

- More than 3,050 products
- High-end LED components
- High product availability

Intelligent project lighting solutions

- Scalable LED control technology
- Holistic LED lighting systems
- Personal project support

Customer-specific Manufacture

- Manufactured light elements
- Precise custom production
- Delivery ready for installation

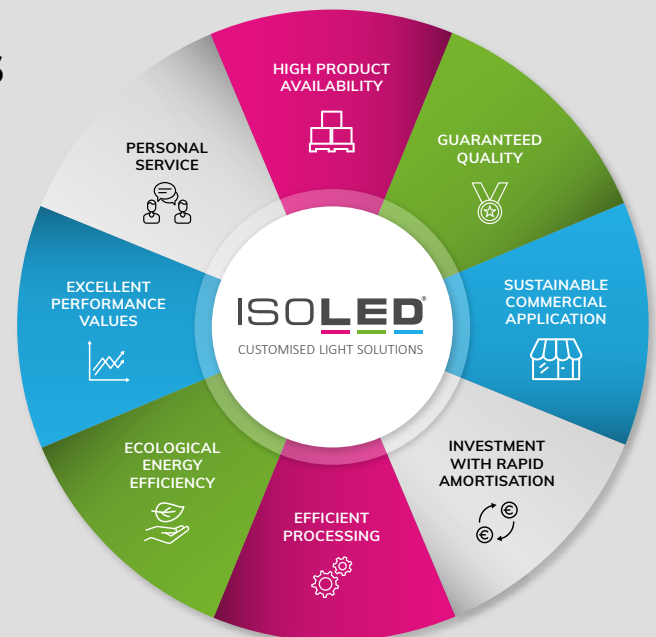

CUSTOMISED LIGHT SOLUTIONS

SUSTAINABLE EFFICIENCY IMPROVEMENT WITH SMART LED LIGHTING CONCEPTS

We are a full-range LED supplier for individual lighting concepts and orient ourselves in the design of our wide product range to both the

- Requirements of our customers as well as on the
- technical progress of LED technology.

Excellent quality, high consulting competence of our employees as well as sustainable growth of our company ensure a reliable and long-term demand coverage with innovative LED lighting solutions for our partners.

THE NEW PRODUCT CATALOGUE COLLECTION ISOLED® 2024

All good things come in fours! For a targeted customer approach, our new collection of ISOLED®2024 product catalogs is divided into four issues. This means that you always have the right catalog with the appropriate product groups at hand. In the spirit of sustainability, you can of course also browse through all catalogs online.

Four topic-specific Catalogs

- » 1200 pages full of highlights
- » Available in: DE, EN, FR, IT & HU
- » Online flip catalog and up valuable print version
- » Prefabricated lighting components
- » Individual lighting concepts
- » Sustainable, intelligent lighting solutions
- » Custom-made products and OEM production

We advise you personally and support you with the realisation of your projects!

DISCOVER ISOLED® ON YOUTUBE

Want to know what the United Glare Rating is all about? Or how to professionally install a drywall profile?

On our new YouTube channel you will find a constantly growing collection of videos on assembly instructions, product worlds, practical applications and knowledge topics.

You Tube VIDEOS ON ALL LED TOPICS

Up to 80 % cost reduction

Fast amortization of investments made and strong cost reduction (with LED illuminants from ISOLED® up to 80 % cost saving compared to traditional illuminants) immediately relieve the running operating costs.

Transparency of your investment costs with a payback calculation from ISOLED® is possible at any time.

We are looking forward to your inquiry!

Why LED?

LED FLEX STRIPES

ISOLED® Flex tapes are particularly characterized by their strong conductor tracks (reduction of the voltage drop) and high-quality components. The power consumption drops, the heat development on the circuit boards is reduced. We offer a wide range of LED flex strips with a length of up to 15 meters per roll.

ISOLED[®] TECHNOLOGY

On the pulse of progress

Driven forward by the innovative power of our specialist team as well as the increasing demands for our customers and the market, taking into account the latest technologies, we develop and design much improved and completely new LED components, products and lighting systems.

Unique through customised

In close cooperation and intensive exchange of our product management team with the production side research & development team, trendsetting, solution oriented and custom lighting concepts with the highest economic and environmental energy efficiency arise.

Our customers and partners benefit consistently from quality, functionality and efficiency.

Sustainable Performance Values and Stable Light Quality

- High energy-efficient light output
- Exact binning
- High-end LED chips, PCBs & Components
- Standardised electronics Excellent product grades
- Reliable thermal management
- Tested materials

Modern ISOLED[®] lighting laboratory

- Multistagequality control
- Batch-managed material flow
- Quality management & warranty services
- Internal & external Quality audits
- Customer-oriented return management
- CE certification

Visionary Innovation

- Product Development
- Intelligent Product Design
- Compact Construction
- Precision Manufacturing Processes
- Latest LED Technology
- Strict Quality Criteria

YOUR PARTNER

ISOLED[®] SINCE 2008

Licensed partnerships

SIGNIFY = PHILIPS

PRODUCT QUALITY AND DESIGN

SUSTAINABLE QUALITY

Your quality requirements are our touchstone

For our customers and partners, we undertake to sustainably supply lights, lighting construction elements and systems, control equipment based on the latest LED technology, as well as all services in

- best and guaranteed quality,
- with the greatest possible ecological efficiency as well as
- economic stability of value sustainably.

ISOLED® Data sheets

Real performance data measured under real conditions are published in a data sheet for each item. Every customer has direct online download access.

Sustainable quality and operational safety

The complete LED ISOLED® product range is CE-marked and therefore complies with the requirements for product conformity according to the latest EU guidelines.

A tested and certified CE product coordinator from ISOLED® takes on the implementation of all ongoing internal standards and cross-checks of the EU regulations. Supplier audits ensure compliance with the CE requirements by the manufacturer.

The heart of our light laboratory are the two ulbricht spheres (diameter 0.5 m and 1.7 m), which are used to measure photometric data.

Trust through data transparency

REAL PERFORMANCE DATA

The satisfaction of our customers and partners is achieved through data transparency. As part of a regimented multi-stage quality control programme, we test and measure all photometric parameters and in addition to numerous additional details, include these within our product datasheets.

Our specified performance data are NOT the result of physical or theoretical calculations, but they correspond to the photometric values of the final overall product actually measured in our in-house light laboratory. (I.e. including reflectors, optics, housing - measured under real ambient conditions, etc.)

On request, we can of course also provide specific reports from our photometric test laboratory.

Whether it is a new acquisition or a conversion to LEDs, both cases are long-term investments. Against this background, it is of particular importance to consider the following quality features in the decision-making process:

- Materials of the individual components (e.g. aluminium housing)
- Glasses and covers
- High-quality workmanship (pay attention to seams and connecting pieces - small proportion of load-bearing plastic elements)
- High quality lacquers
- TÜV certification
- Protection class IP (dust and water protection)
- D-marking acc. EN 60598-24 (LED lights suitable for use in fire-endangered locations)
- Glare factor (UGR acc. EN 12464)
- Timeless and architecturally integrating aesthetics

Your quality standard is our touchstone!

The matching LED illuminants are of tested quality and designed for commercial use. LED branded products from ISOLED® consist exclusively of high-quality components, which are manufactured in selected materials in modern and innovative production processes. Only tested LED chips and standardised components (excellent quality classes) are used.

They convince with their performance values:

- service life
- Light quality
- Luminous flux
- Light intensity
- Color rendering
- Color temperature
- Connected load
- Heat generation (cooling) etc.

LED chips and components of the highest quality classes

LED branded products from ISOLED® consist exclusively of high-quality components, which are manufactured in selected materials in modern and innovative production processes.

Only tested LED chips and standardised components (excellent quality) are used. Our LED products must meet the prescribed performance values in accordance with the strictest quality and test criteria without any complaints in order to be finally released for sale.

ADVANTAGE THROUGH KNOW-HOW

Improving consultancy skills

We combine many years of experience in technical application areas with LED know-how and pass both on to our employees.

With a deep understanding of the economic and environmental efficiency of LED light solutions, as well as enthusiasm for this sustainable and environmentally friendly type of lighting, they support our customers and partners through each LED project.

Specific customer training

We have a major interest, in training you and your employees in the topics of

- ISOLED® Product knowledge,
- ISOLED® application technology,
- LED basic knowledge and
- LED sales

for basic training and further development.

„Confidence comes with knowledge, this is why we share our expertise!“

ISOLED® Team

ISOLED® ACADEMY

TAKE ADVANTAGE OF OUR OFFER

We offer **onsite and offsite training**. Whether in-house, by phone or webinar - you and your employees will receive all information and documents from us.

- » LED know-how
 - LED technology basics
 - ISOLED® product training
 - ISOLED® workshops for LED application technology
 - ISOLED® Workshop “Lighting design with DIALux”
 - Customer-specific LED workshops

- » ISOLED® sales support for customers, partners and their staff
 - LED starter support for trade and crafts
 - Target group definition/market approach - How to reach your target customers (ISOLED® industry focus)!
 - 100% LED - targeted argumentation with facts. With knowledge you score points with customers!
 - 100 % ISOLED® - this is how you and your customers benefit from the ISOLED® range of services!
 - Customer-specific ISOLED® workshops

We would be happy to create your personal training program tailored to your team!

Please contact us and book your individual workshop!

ACADEMY

MORE THAN "JUST A WEB-SHOP"

In our extensive online portal you will find everything your "LED heart" desires. Whether knowledge, training or video instructions - we provide you with all the materials and services that you or your customers need.

KNOWLEDGE

ADVANTAGE THROUGH KNOW-HOW. WE SHARE OUR KNOWLEDGE!

Bundled knowledge on important topics from LED technology as well as application-specific assistance and instructions.
