

# LINKLINE50

## Maximum flexibility in design

The advanced LED linear system for high-quality room lighting. Thanks to a wide range of smart connectors, it offers virtually limitless possibilities for lighting design. Whether straight lines, corners or cross-connections – the luminaire elements can be effortlessly combined and precisely tailored to the architectural features of your room. Thanks to pre-wired Linklines and practical internal connectors, installation is incredibly simple.

Together with the optional recessed modules, the pendant luminaires are enhanced with an upward-facing light component. This provides additional pleasant, indirect ceiling illumination and harmonious overall lighting.

## Advantages of the Linkline50 linear system:

- » **Modularly expandable**  
in 60 cm / 120 cm increments for custom lighting designs
- » **DALI dimmable**
- » **ColorSwitch 3.000 | 4.000 K**  
Adjustable colour temperature to suit your needs
- » **Illuminated connectors**  
For continuous, creative lines of light without interruption
- » **UGR<19 prismatic cover**  
Glare-free lighting with high efficiency (120 lm/W, eligible for funding)
- » **High standard of lighting technology**  
Optional flush-mounted module with magnetic attachment, CRI 90 and continuous light lines thanks to the rolled cover
