## Brückengützl AKTIVSTALL

Martin Fankhauser and his family rely on the efficient LED technology of ISOLED® in their active stable Brückengützl in Kirchdorf/Tyrol (A), newly built in 2017.

For the sake of the animal and the environment- a lighting concept tailored to the equestrian sport guarantees

- » a safe riding operation,
- » protects the animals from unnecessary light pollution and irritation both at dusk and at night and
- » offers perfect conditions for enthusiastic riders to practice their passion.

In addition to excellent lighting quality, sustainable energy cost savings and, in particular, ecological considerations were key factors in the decision to implement an LED-based lighting concept at the new site.

We are pleased and thank the Fankhauser family for the trust they have placed in us!

CUSTOMISED LIGHT SOLUTIONS

## LED LIGHTING SOLUTION FROM ISOLED® FOR RIDING HALLS

### MORE SAFETY AND PERFORMANCE FOR RIDER AND HORSE

The correct lighting in riding and lunging arenas is of enormous importance, especially since the safety and health of people and animals is at stake. Especially in the twilight and evening hours, it is essential to offer a lighting solution that is tailored to the existing architecture and equestrian sport to the riders and horses.

Normally, illuminance of 200 to 500 lux is recommended for equestrian operations - depending on the type of sport practised in the hall (e.g. for show-jumping an average of around 300 lux). For championships, there are association-specific requirements which need to be taken into account.

## LED HALLS - LINEAR LIGHTS FROM ISOLED®

Uniform, flicker-free lighting with high Energy and cost efficiency

### Linear lightbars

The high-bay linear luminaires are equipped with a diffuse (frosted) polycarbonate cover (shock and impact resistant), which combines the individual integrated LED chips to form a homogeneous, linear light bar. This means that no light points are visible!

### No flickering

Furthermore, LED high-bay linear luminaires from ISOLED® are absolutely FLICKERFREE (especially animals react very sensitively to the flickering of lights, become restless and feel stressed out).

### More performance and safety

The neutral white light (4,200 K) with the colour rendering index of CRI>84 has both a vitalising and activating effect on humans and animals, promotes performance and contributes significantly to safety.

LED HALL-LINEAR LUMINAIRE

150CM | 200W | NEUTRAL WHITE | IP65 | 1-10V DIMMABLE

SIMPLE, FAST ASSEMBLY/INSTALLATION HORIZONTALLY  
ADJUSTABLE RING SUSPENSION

**ITEM NO. 112732**

SYS-ONE RADIO RECEIVER

PUSH-DIMMER | 0-10V OUTPUT | 230V

**ITEM NO. 112711**

### Adjust brightness

The LED high bay linear luminaires are dimmable 1-10 V CD. The brightness can be controlled with the SYS-ONE radio receiver/push dimmer shown here.

CUSTOMISED LIGHT SOLUTIONS

## AVOID RIDING ACCIDENTS - NO LIGHT/SHADOW CHANGE

Lighting concepts with LED high-bay linear luminaires installed in accordance with the light calculation and planning create an even, full-area and ideal light distribution throughout the entire riding hall. In addition, the diffuse enclosure of the high-bay linear luminaire reduces glare.

Horses are very sensitive and can break out, stop suddenly or make erratic movements when light/shadow changes. Twilight vision in horses is very pronounced.

### LED HIGHBAY LUMINAIRES LINEAR - YOUR ADDED VALUE AT A GLANCE!

Reliable 200 Watt rated power due to high-end LED chips

Strong, sustainable light output of 25,000 lumens (4,200 Kelvin/neutral white)

High quality LED high bay linear luminaire with extremely robust aluminium housing

Diffuse, glare-reducing polycarbonate cover | shock and impact resistant

Compact design with protection class IP65

5 YEARS GUARANTEE

Balanced thermal management for long service life (50,000 operating hours)

1- 10 V DC dimmable (control signal or potentiometer)

Including external branded transformer from Meanwell with 20 cm long 3-pole supply line

Ambient temperature from -30° to +60

Simple, fast assembly/installation | horizontally adjustable ring suspension

CUSTOMISED LIGHT SOLUTIONS

## UP TO 1000 WATT TOTAL CONNECTED LOAD

LED linear lights (class II) with 36 watts provide pleasantly bright lighting for outdoor use (luminous flux is 3,760 lumen/4,000 Kelvin neutral white). The housing is made of PVC, the design corresponds to protection class IP65.

### Speciality

Can be extended as required! These linear lights can be connected up to a total connected load of 1,000 W can be strung together.

LED LINEAR LIGHT

36 W | IP65 | NEUTRAL WHITE

ITEM NO. 112704

## LED LINEAR LIGHTS - SUSTAINABLE ENERGY EFFICIENCY WITH TOP LIGHTING QUALITY!

Sustainable light output of 3,760 lumens | 105 lumens/watt

Color temperature of 4,000 Kelvin | Color rendering index is CRI>85

Class II luminaire - no connection to PE required

Protection class IP65

Luminaires can be installed side by side up to a total of 1,000 W

High quality construction with high impact resistance (IK08)

Optimal thermal management for long service life (30,000 operating hours)

Simple and fast assembly

Accessories for ceiling/wall mounting included

Adjustable swivel brackets and cable suspension set optionally available
