ISOLED®

CUSTOMISED LIGHT SOLUTIONS

The Austrian company Profipack Verpackungsmaschinen GmbH with its current headquarters in Schwoich near Kufstein (A) was founded in 1998 by Andreas Zaglacher. Profipack designs, builds, programs and maintains fully automatic packaging machines and systems. Meanwhile Profipack serves more than 800 customers from the food & beverage and non-food sectors throughout Europe.

Competence creates trust

The key success factors of the service-oriented plant manufacturer are the excellent and sustainable quality of the machines, the short installation and commissioning times as well as the reliable and timely processing of all customer orders and the sound expertise of its experienced employees. This creates trust among customers and partners.

The services offered for third-party machines and lines from renowned brand manufacturers such as Kettner, Krones, KHS, Schaefer and A&F play a significant role in the company's sustain-

ned growth. Customers and partners benefit from the entire range of services and rely on the professional execution of servicing, maintenance, mechanical and electronic conversions and extensions, line analyses and much more.

A feel-good atmosphere as a success factor

„The workplace is also living space. I wish for satisfied employees who pursue our company goals with pleasure every day and contribute to our common success. This is one of the reasons why I decided to work with LEDs. Lighting conditions adapted to the tasks at hand create an activating and motivating environment in which we enjoy spending many hours and are able to provide excellent performance even at the end of the day.“

ANDREAS ZAGLACHER, MANAGING DIRECTOR
PROFIPACK VERPACKUNGSMASCHINEN GMBH

SITE EXPANSION WITH NEW COMPANY BUILDING

New installation of a sustainable LED lighting concept

Requirements for the LED lighting solution from ISOLED®:

1. Fulfilment of all photometric, architectural and commercial parameters with an integrated LED lighting solution.
2. Best light quality at the best price.
3. Increase in ecological and economic energy efficiency.
4. Rapid amortisation of investment costs
5. Strong reduction of the current power consumption.
6. Reduction of maintenance operations and costs to a Minimum.
7. Excellent product quality with a long service life in a timeless design.
8. LED luminaire and light source supplier with
 - » personal consulting service on site,
 - » the guarantees customary in the market,
 - » the guarantee of a sustainable spare parts supply and
 - » a long-term product availability

New office space on 500 m²

The human eye is exposed to large amounts of visual stimuli. Good lighting, adapted to the task at hand, helps to withstand these stimuli as unharmed as possible and to maintain physical and mental well-being. LED panels with 50 W and ultra-flat LED downlights with 10 W create an activating and motivating atmosphere.

New production hall with almost 2,000 m²

With the LED hall lights (150 W, cold white) and T8 LED tubes (33 W, neutral white) from ISOLED®, the Profipack company offers its employees a bright and safe working environment, in which the productivity of the company is of course also significantly increased to the benefit of its customers and partners.

INCREASED PRODUCTIVITY WITH LED LIGHTING QUALITY

Personal advice - the pillar of a partnership

Andreas Zaglacher is enthusiastic about the personal consulting service of the reliable and competent contact persons at ISOLED® and announces:

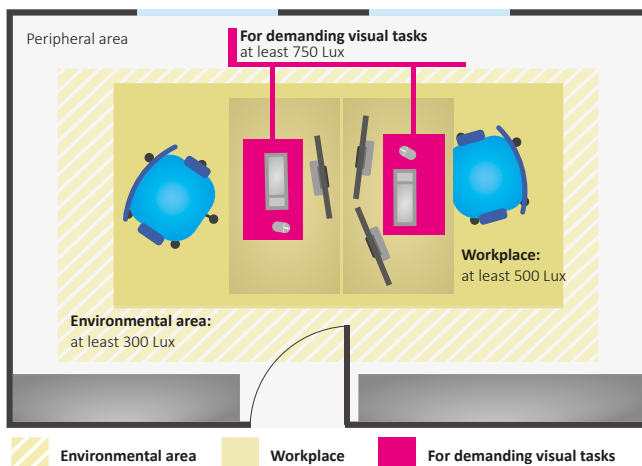

„For the forthcoming renovation of our older production wing, we are also relying on the sustainable LED technology of our partner ISOLED®.“

ANDREAS ZAGLACHER, MANAGING DIRECTOR PROFIPACK
VERPACKUNGSMASCHINEN GMBH

Light as a value-adding factor

People-oriented LED lighting solutions increase the attractiveness of the workplace and are a direct value-added factor for the employer. The optimally designed lighting solution

- » promotes productivity,
- » increases the performance,
- » increases the effectiveness,
- » is vitalizing and boosts drive,
- » reduces accidents at work and sick leave,
- » drives idea and creativity processes &
- » ultimately leads to more sustainable
- » cost saving.

Minimum illuminance at the workplace in the office

The workplace in the office must comply with the standard DIN EN 12464-1 be illuminated with at least 500 lux, and even at least 750 lux in subareas where special visual tasks are performed (e.g. in the area of the monitors).

The specifications for peripheral and surrounding areas of an office room are considerably lower. Here, 300 lux is already sufficient to comply with the standard.
